

### **Niuhi**

Aloha! My name is Hae. I am a niuhi, or tiger shark. I have a special ability to detect movement in the water. This helps me to find injured or dying animals, which I like to eat. I usually search for these animals in murky or cloudy water since it is difficult for them to see me coming. The only problem with this is that sometimes I can get confused and accidentally bite a human when I am really trying to hunting a monk seal or turtle. Opps! I play an important role in the ocean since I remove dying animals from the water which helps to keep the ocean clean.
